This site-specific working describes the important values of an individual flora reserve and identifies site-specific priorities for management. The plan is to be read in conjunction with the Flora Reserve Plan: Background and General Management document, which identifies Forestry Corporation's broad objectives and strategies for managing flora reserves. These two documents together form the flora reserve working plan in line with the requirements of section 25 of the *Forestry Act 2012*.

1. DETAILS OF THE RESERVE

1.1 LOCATION

Maxwells Flora Reserve is located within Nadgee State Forest on the Far South Coast of New South Wales, approximately 40 kilometres south of Eden in a direct line, and about 50 kilometres by road. The reserve in part adjoins the Nadgee Nature Reserve, administered by the National Parks and wildlife Service, and it is located less than 2 km from the border with the State of Victoria. See Locality Map in Appendix 1.

1.2 KEY ATTRIBUTES OF THE RESERVE

Under the *Forestry Act 2012*, flora reserves are set apart for the preservation of native flora.

The reserve possesses the following identified attributes that are to be protected:

- » a stand of Pinkwood – Lilly Pilly rainforest at a relatively low altitude
- » several particularly large specimens of tree, including Blackwood (*Accacia melanoxylon*), Bolwarra (*Eupomatia laurina*), Yellow Stringybark (*Eucalyptus muelleriana*), and Mountain Grey Gum (*Eucalyptus cypellocarpa*)
- » flora species occurring in the reserve of limited distribution in the region
- » representative examples of forest ecosystems in the area.

1.3 GENERAL DESCRIPTION

Area

Maxwells Flora Reserve has an area of about 510 hectares.

Topography

The reserve consists of the headwaters of two adjoining creek systems, Maxwells Creek draining north and Royds Creek, on the south, draining towards the west. Both creeks ultimately flow into the Wallagarough River, which enters the sea at Mallacoota Inlet, in Victoria. Topography is moderately steep to steep, and altitude ranges from 100 metres above sea level to 340 metres. Refer to Appendix 2 for topographic map.

Geology and Soils

The reserve is characterised by a geology of Ordovician metamorphosed sediments, while Devonian granitoid rocks have intruded at the top end of both catchments. Soils are generally a deep red-yello gradational type, being of moderate to low erodibility. Shallower stony soils occur on the ridgetops.

Climate

Document title: Maxwells Site Specific Working Plan	Version No.: 2	Page 3 of 19
Document ID: D22/5562	Owner: Senior Manager Forest Stewardship	Issue date: 6/9/23
		Review date: 6/9/33

WARNING: a printed copy of this document may be uncontrolled. Please verify this is the latest version prior to use.

Rainfall generally is variable, the annual precipitation at Eden, with a mean of 898 mm, ranging from a low of 432 mm to a high of 1822 mm. At Timbillica, some 11 km to the northwest, the annual rainfall is about 990 mm, but it would probably be somewhat lower in the reserve, which lies in the lee of the Nadgee Range.

Based again on records from Timbillica, where the inland location would resemble that of the reserve, the mean of the summer absolute maxima is about 32°C, with occasional days higher. Mean winter maxima are about 16° C, and the minima about 2° C with frosts common, though in the forested conditions of the reserve frost would be unusual.

Prevailing winds are from the west to southwest in winter, and west to northwest in summer. Proximity to the coast also results in the easterly sea breeze effect prevailing in summer.

Vegetation / flora and fauna

Three main forest types occur in the reserve. Using the classification of the Forestry Commission of N.S.W. (Res. Note No. 17), these are:

- » Type 18. Pinkwood: This rainforest community occurs along the gullies in both catchments and shows a merging of features of the Pinkwood (*Eucryphia moorei*) cool temperate rainforest and the Lilly Pilly (*Acmena smithii*) warm temperate rainforest, with the Lilly Pilly tending to be dominant in the Royds Creek catchment. The locality is at unusually low altitude for the occurrence of Pinkwood. The area of rainforest in the reserve is about 130 ha.
- » Type 112. Silvertop Ash: A dry sclerophyll forest community, clearly dominated by Silvertop Ash (*Eucalyptus sieberi*) and occurring on the higher ridges, particularly where the aspect is towards the west. The type has a sparse understorey and covers an area of about 30 ha.
- » Type 157. Yellow Stringybark – Mountain Grey Gum. This is an often-tall forest type dominated by Yellow Stringybark (*E. muelleriana*) and Mountain Grey Gum (*E. cypellocarpa*). Other trees present include Messmate (*E. obliqua*), Silvertop Ash and Gully Peppermint (*E. smithii*). It occupies the slopes between the rainforest and the Silvertop Ash type and varies from wet sclerophyll forest with a dense understorey to dry sclerophyll forest. It occupies an area of about 210 ha.

Appendix 2 Map shows the various forest types and their locations within the reserve.

The vegetation of the reserve, as in most parts of the South Coast, has been affected by wildfire, and in October 1980 fire burnt through most of the rainforest in the Royds Creek catchment, though it only burnt to the margin of the Maxwells Creek rainforest. The westerly aspect of Royds Creek, the logging in previous years, and the damage to the rainforest from this logging would all have been factors leading to the fire damage in this rainforest stand, and the repeated history of fire in this catchment, compared with the more protected Maxwells Creek Catchment, appears in part at least to explain the lower occurrence of Pinkwood and the greater presence of the more fire-resistant Lilly Pilly.

The Maxwells Creek rainforest is probably the best extant stand of Pinkwood-Lilly Pilly rainforest at a relatively low altitude. It contains some unusually large specimens of Lilly Pilly, an abundance of tall Prickly Tree Ferns (*Cyathea leichhardtiana*), which is known elsewhere south of Batemans Bay only in the Pinkwood rainforest stands on Mt. Dromedary, and among the largest known specimens of the primitive flowering plant, Bolwarra (*Eupomatia laurina*), with a height of 15 m and a stem diameter of 25 cm: Bolwarra, which is a common rainforest plant, usually grows as a shrub. The rainforest also contains one of the State's largest known specimens of Blackwood (*Accacia melanoxylon*), with a height of 39 m and a stem diameter (diameter at breast height) of 84 cm.

The reserve also contains two outstanding specimens of eucalypts, both entered in the Forestry Commission Register of Outstanding Trees:

- » Mountain Grey Gum (*E. cypellocarpa*) Height: 56 metres. Diameter at breast height: 3.36 metres.
- » Yellow Stringybark (*E. muelleriana*) Height: 52 metres. Diameter at breast height: 3.30 metres.

Document title: Maxwells Site Specific Working Plan	Version No.: 2	Page 4 of 19
Document ID: D22/5562	Owner: Senior Manager Forest Stewardship	Issue date: 6/9/23
		Review date: 6/9/33

WARNING: a printed copy of this document may be uncontrolled. Please verify this is the latest version prior to use.

Since being measured the Yellow Stingybark has shown signs of crown deterioration and is clearly in an advanced state of senescence, demonstrating an inevitable part of the life cycle of all trees. It is unclear whether this tree survived the 2019/2020 wildfires.

Undergrowth in the eucalypt forest types varies from sparse on the drier northerly and westerly aspects to a dense shrub and grass cover on the southerly and easterly slopes and in the gullies.

Three species of plants occurring in the reserve are of somewhat limited distribution in the region. These are:

- » *Adiantum formosum* (Giant Maidenhair: Adiantaceae). Restricted to certain gully sites, and usually in small populations.
- » *Phebalium squamulosum* (Rutaceae). Common in the reserve, occurring as a shrub in the eucalypt forest types.
- » *Poa helmsii* (Poaceae). A grass normally occurring in the Southern Tablelands and in eastern Victoria. This coastal occurrence is unusual.

The reserve offers a range of ecotones with resultant edge effects of structural and floristic diversity. This habitat diversity has led to high species numbers and population densities of fauna. Over 40 species of birds were found in a brief survey within the reserve. A survey of small mammals produced a capture rate of 80 percent, with *Antechinus stuartii*, *A. swainsonii*, *Rattus fuscipes* and *R. lutreolus* being common. A survey of gliders in the Yellow Stringybark-Mountain Grey Gum type indicated large populations of Sugar Gliders (*Petaurus breviceps*), Feathertail Gliders (*Acrobates pygmaeus*), and Yellow-bellied Gliders (*Petaurus australis*). The Greater Glider (*Schoinobates volans*) also occurs. Macropods, such as the Swamp Wallaby (*Wallabia bicolor*), Rednecked Wallaby (*Macropus rufogriseus*) and Eastern Grey Kangaroo (*Macropus giganteus*) are also common. Appendices 3 and 4 outline a list of flora and fauna species known to occur within the reserve.

1.4 HISTORY

Aboriginal Heritage and Cultural Values

Maxwells Flora Reserve is situated within the traditional lands of the Yuin people and there are a number of Aboriginal cultural heritage sites located within or within the surrounding area. The area is part of a cultural landscape, used for everyday and ceremonial activities including seasonal food and resource gathering and also as a travel route from the mountains to the coast. Tangible aspects of these activities are evident as walking tracks and scar trees, the remains of camp sites with stone tools (isolated stone artefact and artefact scatters) as well as sacred features and places created at the beginning of time.

Post European Settlement

Harvesting and grazing

The surrounding area has had a long history of harvesting activities. A sawmill was located in the vicinity up to the 1960's, and pulpwood harvesting was carried out in adjacent areas in the 1970's.

Parts of both the eucalypt forest types, totaling about 95 ha, were logged between 1975 and 1978, before the area was proposed for Flora Reserve notification. The logging was more widespread in the Royds Creek catchment, where several coupes extended to the edge of the rainforest and in places the heads of felled trees disturbed the rainforest canopy. The logged sites have all regenerated well.

There is no record of the area ever having been grazed by domestic stock.

Fire

Document title: Maxwells Site Specific Working Plan	Version No.: 2	Page 5 of 19
Document ID: D22/5562	Owner: Senior Manager Forest Stewardship	Issue date: 6/9/23
		Review date: 6/9/33

WARNING: a printed copy of this document may be uncontrolled. Please verify this is the latest version prior to use.

Fire has been part of the Australian landscape for at least the last 60,000 years and most forests have experienced fire multiple times over many centuries. The area that includes the Flora Reserve has had a severe fire history. The severe wildfires of 1938/39 and 1951/52 passed through the area.

The Nadgee fire of 1972 burned some 3000 hectares of Nadgee State Forest. In November 1980 the Timbillica fire burned through the area covering a total of 44 000 hectares, which included much of the 1972 Nadgee fire area.

Most recently, the reserve was impacted by wildfire during the 2019/20 summer season. Medium to high fire intensity was recorded, resulting in the canopy being partially burnt in discrete areas.

The area covered by the Flora Reserve, being generally a moist gully system, does not appear to have suffered the same severe damage as surrounding areas of forest, although the Timbillica fire burnt through some of the rainforest in the Royds Creek basin.

Establishment of Flora Reserve

The area now notified as a Flora Reserve has been less formally set aside under the Forestry Commission Native Forest Preservation programme since 1983.

An area of 370 hectares was gazetted as Maxwells Flora Reserve No. 116 on 4th March 1988. The Flora Reserve was extended by approximately 138 hectares (No 1 extension) on 1st January 1999, for a total area of approximately 508 hectares.

1.5 CURRENT USAGE

All weather access to the Flora Reserve is provided by Maxwells, Royds Creek and Nadgee Roads. A system of logging access roads were constructed along some ridges in the Flora Reserve area for the logging operations in the 1970's.

The Flora Reserve is currently included as part of the Wallagaraugh Forest Drive. Estimated annual visitation is about 700 people.

The reserve receives moderate recreational usage, as the reserve contains Maxwells picnic area that includes fireplaces, picnic tables, and water storage facilities. A walking track with interpretative signs has also been constructed through a rainforest gully.

2. SYSTEM OF MANAGEMENT

2.1 OBJECTIVES OF MANAGEMENT

The objects of management will be to:

- » protect existing flora and fauna, including the flora species occurring in the reserve of limited distribution in the region
- » preserve stands of Pinkwood – Lilly Pilly rainforest
- » protect the several large specimens of trees occurring within the reserve (Blackwood, Bolwarra, Yellow Stringybark, and Mountain Grey Gum)
- » protect representative examples of forest ecosystems in the area
- » protect Aboriginal cultural heritage sites and cultural values
- » maintain reference stands and provide for limited scientific study consistent with the protection of the area, including the development of an understanding of successional growth processes after

Document title: Maxwells Site Specific Working Plan	Version No.: 2	Page 6 of 19
Document ID: D22/5562	Owner: Senior Manager Forest Stewardship	Issue date: 6/9/23
		Review date: 6/9/33

WARNING: a printed copy of this document may be uncontrolled. Please verify this is the latest version prior to use.

disturbance and as a reference for assessing the effects of alternative land use in surrounding areas

- » provide for the continued protection of the reserve and neighboring areas from damaging wildfire and other agents.

2.2 MANAGEMENT STRATEGIES

The broad management strategies and related actions to preserve native flora and improve the value and extent of habitat in State forest flora reserves are detailed in the Flora Reserve Management Plan: Background and General Management document, which is to be read in conjunction with this plan. Specific additional management strategies applied in this flora reserve may include:

- » Property maintenance, through:
 - establishment and maintenance of appropriate fences, gates, and signs
 - removal of unnecessary fencing
 - maintenance of roads and trails
 - restricting visitor use to walking trails for educational activities.
- » Conservation and improvement of habitat, through:
 - maintenance of native vegetation, which may include manipulation by mechanical means for habitat improvement
 - regeneration of any cleared or degraded land, through plantings and natural recruitment
 - removal of rubbish
 - weed control
 - management of human disturbance, including harvesting and other forest product operations
 - retention of dead timber and other habitat resources
 - management of fire, including prescribed or hazard reduction burning.
- » Pest animal control.

Cultural Values

Explore opportunities for Aboriginal community involvement in managing the flora reserve.

Weeds

The vegetation within the flora reserve is in very healthy state with no obvious weeds present. As far as reasonably practicable, exotic species will be controlled, as detailed in section 2.4.

Trail maintenance

Maintenance of roads and trails is important to enable access to the forest for forest management, firefighting, tourism, and recreation. Poorly maintained roads can also transport significant levels of sediment, increasing the turbidity of water within creeks. This consequently reduces habitat quality and aquatic biodiversity and can take significant periods of time to recover.

Permitted activities

Under the Forest Management Zoning (FMZ) system, Maxwells Flora Reserve No. 116 is a dedicated reserve zoned FMZ 1 and therefore contributes to the dedicated reserve system in the Southern Region. Management will be consistent with the requirements of JANIS dedicated reserves.

Document title: Maxwells Site Specific Working Plan	Version No.: 2	Page 7 of 19
Document ID: D22/5562	Owner: Senior Manager Forest Stewardship	Issue date: 6/9/23
		Review date: 6/9/33

WARNING: a printed copy of this document may be uncontrolled. Please verify this is the latest version prior to use.

The State Forests of NSW, Operational Circular 99/10 (1999) *Managing our Forests sustainably: Forest Management Zoning in NSW State Forests* describes the activities not permitted in FMZ 1.

The following activities may be permitted subject to standard conditions approved by the delegated Manager and consistent with the management objectives for the reserve, relevant codes of practice, forest practices / operational circulars, protocols, licenses, and management / recovery plans:

- » scientific studies (e.g., fauna surveys including trapping)
- » maintenance of existing roads and fire trails
- » maintenance of existing recreation facilities and upgrading where necessary to keep pace with demand while protecting the attributes of the reserve
- » limited tree and or limb removal for safety, viewing or construction of facilities in areas used for recreation
- » pest animal and weed control
- » general access for activities such as bush walking, photography, and nature study
- » beekeeping (existing set-down sites may be used)
- » Aboriginal use of forest products consistent with the maintenance of the conservation attributes to be protected in the reserve
- » fire management will be undertaken in a manner consistent with maintaining the health of forest ecosystems.

The following activities may only be permitted with special conditions:

- » Construction of new roads. Construction will only be permitted in exceptional instances and consistent with the following principles:
 - no practical alternative is available
 - the attributes of the reserve will not be significantly affected by the road or fire trail
 - opportunity is provided for public comment on the proposal, obtained through advertising in the local newspaper
 - Ministerial approval is given for the proposal.

Mining

The reserve was exempted from the provisions of the *Mining Act 1992* by notice in the Government Gazette of 14th October 1988, exclusive of any land lying below the surface at a depth greater than 20 metres.

2.3 MANAGEMENT RESPONSIBILITY

The reserve will be administered by Forestry Corporation of NSW's Hardwood Division, with the authority for decision making delegated to the Senior Manager Forest Stewardship equivalent level manager.

2.4 MONITORING, REPORTING AND REVIEW

The region will monitor changes to the key attributes of the reserve and will review the effectiveness of the management strategies designed to protect those attributes and to achieve the management objectives.

The results of this monitoring, review and management response will be included in annual reporting processes.

Document title: Maxwells Site Specific Working Plan	Version No.: 2	Page 8 of 19
Document ID: D22/5562	Owner: Senior Manager Forest Stewardship	Issue date: 6/9/23
		Review date: 6/9/33

WARNING: a printed copy of this document may be uncontrolled. Please verify this is the latest version prior to use.

The provisions of this working plan will be amended, if necessary, in light of the results of the monitoring program and / or legislative change and with the approval of the Minister administering the *Forestry Act 2012*.

APPENDIX 1 – LOCALITY MAP

APPENDIX 2 – TOPOGRAPHIC & FOREST TYPE MAP

APPENDIX 3 – FLORA SPECIES LIST

Flora found within 5000m of Flora Reserve, desktop search undertaken February 2022

Scientific name
<i>Acacia aculeatissima</i>
<i>Acacia cognata</i>
<i>Acacia longifolia</i>
<i>Acacia longifolia subsp. longifolia</i>
<i>Acacia mearnsii</i>
<i>Acacia melanoxylon</i>
<i>Acacia mucronata subsp. longifolia</i>
<i>Acacia myrtifolia</i>
<i>Acacia obtusifolia</i>
<i>Acacia oxycedrus</i>
<i>Acacia subporosa</i>
<i>Acacia terminalis</i>
<i>Acacia terminalis subsp. angustifolia</i>
<i>Acacia verticillata subsp. verticillata</i>
<i>Acmena smithii</i>
<i>Adiantum aethiopicum</i>
<i>Allocasuarina littoralis</i>
<i>Allocasuarina nana</i>
<i>Allocasuarina paludosa</i>
<i>Allocasuarina verticillata</i>
<i>Alyxia buxifolia</i>
<i>Amperea xiphioclada</i>
<i>Amperea xiphioclada var. xiphioclada</i>
<i>Angophora floribunda</i>
<i>Anisopogon avenaceus</i>
<i>Aotus ericoides</i>
<i>Arthropodium milleflorum</i>
<i>Asplenium flabellifolium</i>
<i>Asplenium flaccidum subsp. flaccidum</i>
<i>Astroloma humifusum</i>
<i>Baeckea linifolia</i>
<i>Baeckea spp.</i>
<i>Banksia cunninghamii</i>

Scientific name
<i>Banksia marginata</i>
<i>Banksia paludosa</i>
<i>Banksia serrata</i>
<i>Bauera rubioides</i>
<i>Baumea acuta</i>
<i>Baumea arthropophylla</i>
<i>Baumea gunnii</i>
<i>Baumea rubiginosa</i>
<i>Baumea tetragona</i>
<i>Bedfordia arborescens</i>
<i>Billardiera scandens</i>
<i>Blechnum cartilagineum</i>
<i>Blechnum neohollandicum</i>
<i>Blechnum nudum</i>
<i>Blechnum patersonii</i>
<i>Blechnum patersonii subsp. patersonii</i>
<i>Blechnum wattsii</i>
<i>Boronia muelleri</i>
<i>Bossiaea heterophylla</i>
<i>Bossiaea kiamensis</i>
<i>Brachychiton populneus subsp. populneus</i>
<i>Brachyloma daphnoides</i>
<i>Brachyscome ciliaris</i>
<i>Brachyscome ciliaris var. ciliaris</i>
<i>Burchardia umbellata</i>
<i>Caesia parviflora</i>
<i>Caladenia catenata</i>
<i>Callitriche muelleri</i>
<i>Calochlaena dubia</i>
<i>Calomeria amaranthoides</i>
<i>Carex appressa</i>
<i>Cassinia aculeata</i>
<i>Cassinia longifolia</i>
<i>Cassinia trinerva</i>
<i>Cassytha glabella</i>
<i>Cassytha glabella f. glabella</i>

Scientific name
<i>Cassytha pubescens</i>
<i>Caustis flexuosa</i>
<i>Centrolepis strigosa subsp. strigosa</i>
<i>Cephalomanes caudatum</i>
<i>Cissus hypoglauca</i>
<i>Clematis aristata</i>
<i>Clematis glycinoides</i>
<i>Comesperma ericinum</i>
<i>Comesperma volubile</i>
<i>Conospermum taxifolium</i>
<i>Coprosma quadrifida</i>
<i>Coronidium elatum</i>
<i>Coronidium scorpioides</i>
<i>Correa alba var. alba</i>
<i>Correa lawrenceana</i>
<i>Correa lawrenceana var. cordifolia</i>
<i>Correa reflexa var. reflexa</i>
<i>Crassula spp.</i>
<i>Crepidomanes venosum</i>
<i>Cryptostylis subulata</i>
<i>Cyathea australis</i>
<i>Cyathea cunninghamii</i>
<i>Cyathea leichhardtiana</i>
<i>Cyathochaeta diandra</i>
<i>Cyperaceae indeterminate</i>
<i>Dampiera stricta</i>
<i>Darwinia camptostylis</i>
<i>Daviesia ulicifolia</i>
<i>Desmodium varians</i>
<i>Deyeuxia contracta</i>
<i>Deyeuxia parviseta</i>
<i>Deyeuxia quadriseta</i>
<i>Dianella caerulea</i>
<i>Dianella caerulea var. caerulea</i>
<i>Dianella revoluta</i>
<i>Dianella revoluta var. revoluta</i>

Scientific name
<i>Dianella tasmanica</i>
<i>Dichelachne rara</i>
<i>Dichondra repens</i>
<i>Dicksonia antarctica</i>
<i>Dillwynia glaberrima</i>
<i>Dillwynia rudis</i>
<i>Dillwynia sericea</i>
<i>Dodonaea triquetra</i>
<i>Drosera auriculata</i>
<i>Drosera binata</i>
<i>Drosera glanduligera</i>
<i>Drosera peltata</i>
<i>Drosera pygmaea</i>
<i>Echinopogon spp.</i>
<i>Elaeocarpus reticulatus</i>
<i>Empodisma minus</i>
<i>Entolasia marginata</i>
<i>Entolasia stricta</i>
<i>Epacris impressa</i>
<i>Epacris microphylla</i>
<i>Epacris obtusifolia</i>
<i>Epacris paludosa</i>
<i>Eucalyptus agglomerata</i>
<i>Eucalyptus baxteri</i>
<i>Eucalyptus consideniana</i>
<i>Eucalyptus cypellocarpa</i>
<i>Eucalyptus elata</i>
<i>Eucalyptus fraxinoides</i>
<i>Eucalyptus globoidea</i>
<i>Eucalyptus longifolia</i>
<i>Eucalyptus muelleriana</i>
<i>Eucalyptus obliqua</i>
<i>Eucalyptus sieberi</i>
<i>Eucalyptus smithii</i>
<i>Eucryphia moorei</i>
<i>Euphrasia collina</i>
<i>Eupomatia laurina</i>
<i>Eustrephus latifolius</i>
<i>Exocarpos cupressiformis</i>
<i>Exocarpos strictus</i>
<i>Fieldia australis</i>
<i>Gahnia clarkei</i>
<i>Gahnia melanocarpa</i>
<i>Gahnia radula</i>
<i>Gahnia sieberiana</i>

Scientific name
<i>Galium binifolium</i>
<i>Galium gaudichaudii</i>
<i>Geitonoplesium cymosum</i>
<i>Geranium homeanum</i>
<i>Geranium potentilloides</i> var. <i>potentilloides</i>
<i>Geranium solanderi</i>
<i>Geranium solanderi</i> var. <i>solanderi</i>
<i>Gleichenia dicarpa</i>
<i>Glycine clandestina</i>
<i>Gompholobium glabratum</i>
<i>Gompholobium huegelii</i>
<i>Gompholobium latifolium</i>
<i>Gompholobium pinnatum</i>
<i>Gonocarpus micranthus</i>
<i>Gonocarpus micranthus</i> subsp. <i>micranthus</i>
<i>Gonocarpus tetragynus</i>
<i>Gonocarpus teucroides</i>
<i>Goodenia ovata</i>
<i>Goodia lotifolia</i>
<i>Gymnoschoenus sphaerocephalus</i>
<i>Gynochthodes jasminoides</i>
<i>Hakea decurrens</i>
<i>Hakea decurrens</i> subsp. <i>physocarpa</i>
<i>Hakea decurrens</i> subsp. <i>platytaenia</i>
<i>Hakea eriantha</i>
<i>Hakea sericea</i>
<i>Hakea teretifolia</i>
<i>Hakea teretifolia</i> subsp. <i>teretifolia</i>
<i>Hakea ulicina</i>
<i>Hardenbergia violacea</i>
<i>Hedycarya angustifolia</i>
<i>Hibbertia aspera</i>
<i>Hibbertia dentata</i>
<i>Hibbertia empetrifolia</i> subsp. <i>empetrifolia</i>
<i>Hibbertia fasciculata</i>
<i>Hibbertia monogyna</i>
<i>Hibbertia riparia</i>
<i>Hibbertia serpyllifolia</i>

Scientific name
<i>Hibbertia</i> spp.
<i>Hierochloe rariflora</i>
<i>Histiopteris incisa</i>
<i>Hovea heterophylla</i>
<i>Howittia trilocularis</i>
<i>Hydrocotyle geraniifolia</i>
<i>Hydrocotyle hirta</i>
<i>Hydrocotyle laxiflora</i>
<i>Hydrocotyle tripartita</i>
<i>Hymenophyllum flabellatum</i>
<i>Hypericum japonicum</i>
<i>Hypolaena fastigiata</i>
<i>Hypolepis glandulifera</i>
<i>Hypolepis muelleri</i>
<i>Indigofera australis</i>
<i>Isopogon prostratus</i>
<i>Juncus pallidus</i>
<i>Kennedia rubicunda</i>
<i>Lachnagrostis filiformis</i>
<i>Lagenophora gracilis</i>
<i>Lasiopetalum macrophyllum</i>
<i>Lastreopsis acuminata</i>
<i>Lastreopsis microsora</i> subsp. <i>microsora</i>
<i>Leionema diosmeum</i>
<i>Lepidosperma concavum</i>
<i>Lepidosperma curtisiae</i>
<i>Lepidosperma elatius</i>
<i>Lepidosperma filiforme</i>
<i>Lepidosperma gladiatum</i>
<i>Lepidosperma laterale</i>
<i>Lepidosperma longitudinale</i>
<i>Lepidosperma neesii</i>
<i>Lepidosperma semiteres</i>
<i>Lepidosperma urophorum</i>
<i>Lepidosperma viscidum</i>
<i>Leptocarpus tenax</i>
<i>Leptospermum continentale</i>
<i>Leptospermum juniperinum</i>
<i>Leptospermum lanigerum</i>
<i>Leptospermum scoparium</i>
<i>Leptospermum sejunctum</i>
<i>Leptospermum squarrosum</i>
<i>Leptospermum trinervium</i>
<i>Lepyrodia scariosa</i>

Scientific name
<i>Lepydodia verruculosa</i>
<i>Leucopogon ericoides</i>
<i>Leucopogon esquamatus</i>
<i>Leucopogon lanceolatus</i>
<i>Leucopogon lanceolatus</i> var. <i>lanceolatus</i>
<i>Leucopogon virgatus</i>
<i>Libertia paniculata</i>
<i>Lindsaea linearis</i>
<i>Logania albiflora</i>
<i>Lomandra confertifolia</i> subsp. <i>leptostachya</i>
<i>Lomandra cylindrica</i>
<i>Lomandra filiformis</i>
<i>Lomandra filiformis</i> subsp. <i>coriacea</i>
<i>Lomandra filiformis</i> subsp. <i>filiformis</i>
<i>Lomandra glauca</i>
<i>Lomandra longifolia</i>
<i>Lomandra multiflora</i> subsp. <i>multiflora</i>
<i>Lomatia ilicifolia</i>
<i>Luzula flaccida</i>
<i>Luzula meridionalis</i>
<i>Lycopodiella lateralis</i>
<i>Lycopodium deuterodensum</i>
<i>Marsdenia rostrata</i>
<i>Melaleuca squarrosa</i>
<i>Microlaena stipoides</i> var. <i>stipoides</i>
<i>Microsorium pustulatum</i>
<i>Microsorium scandens</i>
<i>Mitrasacme polymorpha</i>
<i>Monotoca scoparia</i>
<i>Myoporium insulare</i> subsp. <i>A</i>
<i>Myrsine howittiana</i>
<i>Notelaea venosa</i>
<i>Olax stricta</i>
<i>Olearia argophylla</i>
<i>Olearia erubescens</i>
<i>Olearia lirata</i>
<i>Olearia stellulata</i>
<i>Olearia tomentosa</i>
<i>Opercularia aspera</i>
<i>Oplismenus aemulus</i>

Scientific name
<i>Oplismenus imbecillis</i>
<i>Oxalis corniculata</i>
<i>Oxalis perennans</i>
<i>Ozothamnus cuneifolius</i>
<i>Ozothamnus obcordatus</i> subsp. <i>major</i>
<i>Ozothamnus obcordatus</i> subsp. <i>obcordatus</i>
<i>Pandorea pandorana</i>
<i>Parsonsia brownii</i>
<i>Passiflora cinnabarina</i>
<i>Patersonia fragilis</i>
<i>Patersonia glabrata</i>
<i>Patersonia sericea</i>
<i>Patersonia</i> sp. aff. <i>fragilis</i>
<i>Persoonia levis</i>
<i>Persoonia linearis</i>
<i>Persoonia silvatica</i>
<i>Phebalium squamulosum</i> subsp. <i>squamulosum</i>
<i>Philothea myoporoides</i> subsp. <i>myoporoides</i>
<i>Phyllanthus hirtellus</i>
<i>Pimelea axiflora</i>
<i>Pimelea axiflora</i> subsp. <i>axiflora</i>
<i>Pimelea linifolia</i>
<i>Pimelea linifolia</i> subsp. <i>linifolia</i>
<i>Pittosporum revolutum</i>
<i>Pittosporum undulatum</i>
<i>Platysace lanceolata</i>
<i>Plectorrhiza tridentata</i>
<i>Plinthanthesis paradoxa</i>
<i>Poa affinis</i>
<i>Poa labillardierei</i> var. <i>labillardierei</i>
<i>Poa meionectes</i>
<i>Poa poiformis</i> var. <i>poiformis</i>
<i>Poa queenslandica</i>
<i>Poa sieberiana</i> var. <i>sieberiana</i>
<i>Polyscias sambucifolia</i>
<i>Polyscias sambucifolia</i> subsp. <i>sambucifolia</i>
<i>Polystichum proliferum</i>
<i>Pomaderris aspera</i>

Scientific name
<i>Pomaderris elliptica</i> subsp. <i>elliptica</i>
<i>Pomax umbellata</i>
<i>Poranthera microphylla</i>
<i>Prostanthera caerulea</i>
<i>Prostanthera incisa</i>
<i>Prostanthera lasianthos</i>
<i>Prostanthera melissifolia</i>
<i>Pteridium esculentum</i>
<i>Pteris umbrosa</i>
<i>Pultenaea benthamii</i>
<i>Pultenaea daphnoides</i>
<i>Pultenaea dentata</i>
<i>Pultenaea linophylla</i>
<i>Pultenaea scabra</i>
<i>Pyrrosia rupestris</i>
<i>Ranunculus lappaceus</i>
<i>Rhytidosporum procumbens</i>
<i>Ricinocarpos pinifolius</i>
<i>Rorippa gigantea</i>
<i>Rubus moluccanus</i> var. <i>trilobus</i>
<i>Rubus rosifolius</i>
<i>Rytidosperma longifolium</i>
<i>Rytidosperma monticola</i>
<i>Rytidosperma pallidum</i>
<i>Samolus repens</i>
<i>Sannantha pluriflora</i>
<i>Sarcochilus falcatus</i>
<i>Sarcochilus parviflorus</i>
<i>Sarcopetalum harveyanum</i>
<i>Scaevola aemula</i>
<i>Scaevola ramosissima</i>
<i>Schizaea bifida</i>
<i>Schoenus brevifolius</i>
<i>Schoenus imberbis</i>
<i>Schoenus lepidosperma</i>
<i>Schoenus lepidosperma</i> subsp. <i>lepidosperma</i>
<i>Schoenus lepidosperma</i> subsp. <i>pachylepis</i>
<i>Schoenus maschalinus</i>
<i>Schoenus melanostachys</i>
<i>Schoenus moorei</i>
<i>Schoenus villosus</i>

Scientific name
<i>Scutellaria mollis</i>
<i>Selaginella uliginosa</i>
<i>Senecio hispidulus</i>
<i>Senecio linearifolius</i>
<i>Senecio minimus</i>
<i>Senecio velleioides</i>
<i>Sigesbeckia orientalis subsp. orientalis</i>
<i>Smilax australis</i>
<i>Solanum aviculare</i>
<i>Solanum pungetium</i>
<i>Solanum vescum</i>
<i>Sowerbaea juncea</i>
<i>Sphaerolobium minus</i>
<i>Sphaerolobium vimineum</i>
<i>Sprengelia incarnata</i>
<i>Sprengelia incarnata f. 'incarnata'</i>
<i>Stackhousia monogyna</i>
<i>Stackhousia viminea</i>
<i>Stellaria flaccida</i>
<i>Sticherus lobatus</i>

Scientific name
<i>Stylidium graminifolium</i>
<i>Symphionema paludosum</i>
<i>Tetraria capillaris</i>
<i>Tetrarrhena juncea</i>
<i>Tetrarrhena turfosa</i>
<i>Tetradlea pilosa</i>
<i>Thelionema caespitosum</i>
<i>Thelionema umbellatum</i>
<i>Thelymitra ixioides var. ixioides</i>
<i>Thelymitra spp.</i>
<i>Themeda triandra</i>
<i>Thysanotus juncifolius</i>
<i>Thysanotus tuberosus subsp. tuberosus</i>
<i>Tmesipteris ovata</i>
<i>Tmesipteris parva</i>
<i>Todea barbara</i>
<i>Tricostularia pauciflora</i>
<i>Tristaniopsis laurina</i>
<i>Tylophora barbata</i>
<i>Urtica incisa</i>

Scientific name
<i>Utricularia dichotoma</i>
<i>Utricularia lateriflora</i>
<i>Veronica plebeia</i>
<i>Viola banksii</i>
<i>Viola hederacea</i>
<i>Wahlenbergia gracilis</i>
<i>Xanthorrhoea australis</i>
<i>Xanthorrhoea concava</i>
<i>Xanthorrhoea minor</i>
<i>Xanthorrhoea minor subsp. lutea</i>
<i>Xanthorrhoea resinosa</i>
<i>Xanthosia pilosa</i>
<i>Xanthosia ternifolia</i>
<i>Xanthosia tridentata</i>
<i>Xyris gracilis</i>
<i>Xyris operculata</i>
<i>Zieria smithii</i>

APPENDIX 4 – FAUNA SPECIES LIST

Fauna found within 5000m of Flora Reserve, desktop search undertaken February 2022

Amphibians and reptiles	
Scientific name	Common name
<i>Litoria citropa</i>	Blue Mountains Tree Frog
<i>Litoria ewingii</i>	Brown Tree Frog
<i>Crinia signifera</i>	Common Eastern Froglet
<i>Geocrinia victoriana</i>	Eastern Smooth Frog
<i>Heleioporus australiacus</i>	Giant Burrowing Frog
<i>Litoria phyllochroa</i>	Leaf-green Tree Frog
<i>Litoria lesueurii</i>	Lesueur's Frog

Amphibians and reptiles	
Scientific name	Common name
<i>Litoria littlejohni</i>	Littlejohn's Tree Frog
<i>Egernia saxatilis</i>	Black Rock Skink
<i>Acanthophis antarcticus</i>	Common Death Adder
<i>Lampropholis delicata</i>	Dark-flecked Garden Sunskink
<i>Tiliqua scincoides</i>	Eastern Blue-tongue
<i>Intellagama lesueurii</i>	Eastern Water Dragon
<i>Amphibolurus muricatus</i>	Jacky Lizard
<i>Varanus varius</i>	Lace Monitor
<i>Austrelaps</i>	Lowland

Amphibians and reptiles	
Scientific name	Common name
<i>superbus</i>	Copperhead
<i>Cyclodomorphus michaeli</i>	Mainland She-oak Skink
<i>Lampropholis guichenoti</i>	Pale-flecked Garden Sunskink
<i>Pseudechis porphyriacus</i>	Red-bellied Black Snake
<i>Eulamprus tympanum</i>	Southern Water-skink
<i>Notechis scutatus</i>	Tiger Snake
<i>Drysdalia coronoides</i>	White-lipped Snake
<i>Eulamprus heatwolei</i>	Yellow-bellied Water-skink

Birds	
Scientific name	Common name
<i>Alisterus scapularis</i>	Australian King-Parrot
<i>Gymnorhina tibicen</i>	Australian Magpie
<i>Aegotheles cristatus</i>	Australian Owlet-nightjar
<i>Anthus novaeseelandiae</i>	Australian Pipit
<i>Zoothera lunulata</i>	Bassian Thrush
<i>Stagonopleura bella</i>	Beautiful Firetail
<i>Manorina melanophrys</i>	Bell Miner
<i>Coracina novaehollandiae</i>	Black-faced Cuckoo-shrike
<i>Monarcha melanopsis</i>	Black-faced Monarch
<i>Falco berigora</i>	Brown Falcon
<i>Gerygone mouki</i>	Brown Gerygone
<i>Accipiter</i>	Brown

Birds	
Scientific name	Common name
<i>fasciatus</i>	Goshawk
<i>Acanthiza pusilla</i>	Brown Thornbill
<i>Cacomantis variolosus</i>	Brush Cuckoo
<i>Hylacola pyrrhopygia</i>	Chestnut-rumped Heathwren
<i>Phylidonyris pyrrhopterus</i>	Crescent Honeyeater
<i>Platycercus elegans</i>	Crimson Rosella
<i>Artamus cyanopterus cyanopterus</i>	Dusky Woodswallow
<i>Pezoporus wallicus wallicus</i>	Eastern Ground Parrot
<i>Falcunculus frontatus frontatus</i>	Eastern Shrike-tit
<i>Acanthorhynchus tenuirostris</i>	Eastern Spinebill

Birds	
Scientific name	Common name
<i>Psophodes olivaceus</i>	Eastern Whipbird
<i>Eopsaltria australis</i>	Eastern Yellow Robin
<i>Cacomantis flabelliformis</i>	Fan-tailed Cuckoo
<i>Petroica phoenicea</i>	Flame Robin
<i>Callocephalon fimbriatum</i>	Gang-gang Cockatoo
<i>Pachycephala pectoralis</i>	Golden Whistler
<i>Cracticus torquatus</i>	Grey Butcherbird
<i>Strepera versicolor</i>	Grey Currawong
<i>Rhipidura albiscapa</i>	Grey Fantail
<i>Colluricincla harmonica</i>	Grey Shrike-thrush
<i>Poliocephalus poliocephalus</i>	Hoary-headed Grebe

Birds	
Scientific name	Common name
<i>Chalcites basalis</i>	Horsfield's Bronze-Cuckoo
<i>Sericornis magnirostra</i>	Large-billed Scrubwren
<i>Dacelo novaeguineae</i>	Laughing Kookaburra
<i>Meliphaga lewinii</i>	Lewin's Honeyeater
<i>Eudyptula minor</i>	Little Penguin
<i>Dicaeum hirundinaceum</i>	Mistletoebird
<i>Glossopsitta concinna</i>	Musk Lorikeet
<i>Falco cenchroides cenchroides</i>	Nankeen Kestrel
<i>Phylidonyris novaehollandiae</i>	New Holland Honeyeater
<i>Pachycephala olivacea</i>	Olive Whistler
<i>Oriolus sagittatus</i>	Olive-backed Oriole
<i>Heteroscenes pallidus</i>	Pallid Cuckoo
<i>Strepera graculina</i>	Pied Currawong
<i>Pycnoptilus floccosus</i>	Pilotbird
<i>Ninox strenua</i>	Powerful Owl
<i>Trichoglossus haematodus</i>	Rainbow Lorikeet

Birds	
Scientific name	Common name
<i>Anthochaera carunculata</i>	Red Wattlebird
<i>Neochmia temporalis</i>	Red-browed Finch
<i>Climacteris erythroptis</i>	Red-browed Treecreeper
<i>Petroica rosea</i>	Rose Robin
<i>Rhipidura rufifrons</i>	Rufous Fantail
<i>Pachycephala rufiventris</i>	Rufous Whistler
<i>Todiramphus sanctus</i>	Sacred Kingfisher
<i>Ptilonorhynchus violaceus</i>	Satin Bowerbird
<i>Petroica boodang</i>	Scarlet Robin
<i>Zosterops lateralis</i>	Silvereye
<i>Tyto tenebricosa</i>	Sooty Owl
<i>Ninox novaeseelandiae</i>	Southern Boobook
<i>Stipiturus malachurus</i>	Southern Emu-wren
<i>Pardalotus punctatus</i>	Spotted Pardalote
<i>Pardalotus striatus</i>	Striated Pardalote
<i>Acanthiza lineata</i>	Striated Thornbill
<i>Malurus cyaneus</i>	Superb Fairy-wren

Birds	
Scientific name	Common name
<i>Menura novaehollandiae</i>	Superb Lyrebird
<i>Lathamus discolor</i>	Swift Parrot
<i>Petrochelidon nigricans</i>	Tree Martin
<i>Zoothera sp.</i>	unidentified ground thrush
<i>Aquila audax</i>	Wedge-tailed Eagle
<i>Hirundo neoxena</i>	Welcome Swallow
<i>Sericornis frontalis</i>	White-browed Scrubwren
<i>Nesoptilotis leucotis</i>	White-eared Honeyeater
<i>Melithreptus lunatus</i>	White-naped Honeyeater
<i>Cormobates leucophaea</i>	White-throated Treecreeper
<i>Caligavis chrysops</i>	Yellow-faced Honeyeater
<i>Zanda funereus</i>	Yellow-tailed Black-Cockatoo

Mammals	
Scientific name	Common name
<i>Vombatus ursinus</i>	Bare-nosed Wombat
<i>Antechinus stuartii</i>	Brown Antechinus
<i>Trichosurus sp.</i>	brush-tail possum
<i>Rattus fuscipes</i>	Bush Rat
<i>Felis catus</i>	Cat
<i>Chalinolobus morio</i>	Chocolate Wattle Bat
<i>Trichosurus vulpecula</i>	Common Brushtail Possum

Mammals	
Scientific name	Common name
<i>Pseudocheirus peregrinus</i>	Common Ringtail Possum
<i>Canis lupus</i>	Dingo, domestic dog
<i>Falsistrellus tasmaniensis</i>	Eastern False Pipistrelle
<i>Ozimops ridei</i>	Eastern Free-tailed Bat
<i>Macropus giganteus</i>	Eastern Grey Kangaroo
<i>Cercartetus nanus</i>	Eastern Pygmy-

Mammals	
Scientific name	Common name
	possum
<i>Acrobates pygmaeus</i>	Feathertail Glider
<i>Vulpes vulpes</i>	Fox
<i>Nyctophilus gouldi</i>	Gould's Long-eared Bat
<i>Chalinolobus gouldii</i>	Gould's Wattle Bat
<i>Petauroides volans</i>	Greater Glider
<i>Pteropus poliocephalus</i>	Grey-headed Flying-fox

Mammals	
Scientific name	Common name
<i>Mus musculus</i>	House Mouse
<i>Macropus sp.</i>	kangaroo / wallaby
<i>Phascolarctos cinereus</i>	Koala
<i>Miniopterus orianae oceanensis</i>	Large Bent-winged Bat
<i>Vespadelus darlingtoni</i>	Large Forest Bat
<i>Nyctophilus geoffroyi</i>	Lesser Long-eared Bat
<i>Vespadelus vulturnus</i>	Little Forest Bat
<i>Perameles nasuta</i>	Long-nosed Bandicoot
<i>Potorous tridactylus</i>	Long-nosed Potoroo
<i>Antechinus mimetes</i>	Mainland Dusky Antechinus

Mammals	
Scientific name	Common name
<i>Potorous sp.</i>	Potoroo
<i>Oryctolagus cuniculus</i>	Rabbit
<i>Rattus sp.</i>	rat
<i>Notamacropus rufogriseus</i>	Red-necked Wallaby
<i>Tachyglossus aculeatus</i>	Short-beaked Echidna
<i>Trichosurus caninus</i>	Short-eared Possum
<i>Isoodon obesulus obesulus</i>	Southern Brown Bandicoot (eastern)
<i>Vespadelus regulus</i>	Southern Forest Bat
<i>Dasyurus maculatus</i>	Spotted-tailed Quoll
<i>Petaurus breviceps</i>	Sugar Glider

Mammals	
Scientific name	Common name
<i>Rattus lutreolus</i>	Swamp Rat
<i>Wallabia bicolor</i>	Swamp Wallaby
<i>Isoodon/Perameles sp.</i>	unidentified Bandicoot
<i>Canidae sp.</i>	unidentified canid
<i>Muridae sp.</i>	unidentified murid rodent
<i>Sminthopsis leucopus</i>	White-footed Dunnart
<i>Austronomus australis</i>	White-striped Freetail-bat
<i>Petaurus australis</i>	Yellow-bellied Glider

APPENDIX 5 – APPROVAL AND AMENDMENTS FROM PREVIOUS VERSION

In line with section 25 of the *Forestry Act 2012*, flora reserve working plans and any amendments must be approved by the Minister. This plan forms part of the working plans for each of the individual flora reserves listed in section 6.

This plan was approved by The Hon. Tara Moriarty MLC, Minister for Agriculture, Minister for Regional New South Wales and Minister for Western New South Wales

Date of approval: 6/9/23
