FORESTRY CORPORATION OF NSW - WESTERN REGION
NATIVE FOREST HARVESTING PLAN No. WCc1609

Refer: FPC 2010/01

Mt Nobby State Forest - Compartment 104-107
Certification

This plan has been prepared in accordance with the Integrated Forestry Operations Approval issued under the Forestry and National Park Estate Act 1998. The Standard Harvest Plan Conditions for Native Forest Operations in Western Region – South-Western Cypress v.3 apply to this operation.

Prepared by: S Gralleis Asst District Manager	Endorsed by: Ross Irvine Environment & Resources Mgr	Approved by: Andrew O'Brien Senior Manager
Signature 	Signature 	Signature 
Date 16/12/2016	Date 12/1/2017	Date 12/1/2017

Note: Approval includes the Harvest Plan Operational Map (HPOM) with the corresponding approval date displayed on the map, verifying final approved version. Locality and forest type maps may be included for information only and do not form a part of this approval.

PRE-OPERATIONAL BRIEFING (SUPERVISING FOREST OFFICER ACKNOWLEDGMENT)

I confirm that I have received a copy of the Harvest Plan for the above Compartment. I have been briefed on the conditions of the Plan. I understand the requirements for supervision and operational control as explained to me by the Forest Manager or his/her delegate.

SUPERVISING FOREST OFFICER: _____

Signature: _____ Date: _____

PRE-OPERATIONAL BRIEFING (LICENSEE/CONTRACTOR ACKNOWLEDGMENT)

No operations may commence under this Harvest Plan before the Licensee/contractor has received a formal pre-operational induction by FCNSW and written approval to commence operations.

I confirm that I have received a copy of this Harvest Plan and that:

- ☐ I understand the conditions of the Plan,
- ☐ I will inform all relevant people not present at this briefing, prior to them starting operations, of these aspects of the Plan, as explained to me by a Forestry Corporation officer.

Signature: _____ Name: _____ Date: _____

Position: _____ Licence No: _____

Principal licensee/contractor/other (explain)

Description of Proposal

White cypress sawlogs and green residue will be harvested under regulation of the Integrated Forest Operations Approval for South-Western Cypress Region.

The operation will use mainly mechanical harvesting and processing to produce logs and forward them to dumps. The logs will be removed from the forest by truck.

Natural regeneration is planned. No after-harvest burning or planting is proposed.

No construction, reopening or upgrading of roads or bush tracks is proposed. Prescriptions for maintenance of existing roads and tracks are specified below.

Area Identification and Yield Estimates

State Forest	Compartment/s	Region	Management Area	Plan Number
Mt Nobby	104 - 107	Western	Condobolin	44809

COMPARTMENT	104	105	106	107
Plan Compartment ID	56238	56239	56240	56241
Gross Area (ha)	238.2	264.7	185.7	244.5
Net Harvest Area (NHA) (ha)	238.2	264.7	185.7	244.5
High Density Area (Y/N)	Entire Tract - Yes			
Estimated Yield Cypress Sawlog (m ³ or t)	450 cu.m	1800 cu.m	450 cu.m	100 cu.m
Estimated Yield Residue (t)	200t	600t	200t	20t

Note: The NHA for the four compartments is approximately 933 ha. In accordance with clause 32 of the South-Western Cypress IFOA areas selected for logging at the time of preparation of the harvesting plan must not exceed 80% of the “net mapped operation area” (ie. the NHA) Harvesting operations must be closely monitored by the most appropriate method to ensure compliance.

Silviculture and Harvesting Prescriptions

The planning area has a long history of silvicultural treatment with reliable records going back to the 1950's.

The mature cypress stands within compartments 104, 105, 106 and 107 were established during regeneration events in the 1890's. They have been thinned on several occasions with the last regeneration treatment occurring in 1989-1992.

The last harvesting event of these compartments, producing sawlog and vineyard material, was during 1983-1987.

These are dry sites, resulting in slow regeneration and growth on retained trees. However, conditions are now suitable for release harvest in most areas, supplemented by thinning harvest in areas where regeneration has been less than adequate.

The area of each silvicultural treatment must be mapped and recorded in the Post-logging information section of this plan.

Silvicultural Planning

The 'release' operation is aimed at releasing established regeneration from competition with the mature overstorey. Once released, the stand will require thinning in the next 10-20 years.

The cypress thinning operation is aimed at reducing competing stems whilst concentrating growth on the retained, higher quality, future sawlogs. This stand will require further thinning in around 10-20 years.

Harvesting Prescription

Stand type	% of net area	Area (refer to HPOM for details)	Treatment Refer to <i>Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3</i> for more detail.
Mature Cypress with adequate regeneration.	70%	Comp'ts 104, 105, 106, 107	<ul style="list-style-type: none"> Release cypress silviculture.
Mature Cypress without regeneration	30% NHA	Comp'ts 104, 105, 106, 107	<ul style="list-style-type: none"> Thinning silviculture

The SFO will ensure that all relevant tree retention and silvicultural prescriptions are met during harvesting operations.

The operation must, as far as practicable, not damage individual plants of good form regeneration or sapling size of white cypress, especially where there are few others nearby.

Tree Marking

The area will be tree marked for **retention**. The operation must, as far as practicable:

- For the allowed species, fall each tree not marked for retention, unless it clearly does not meet the product standard, and
- Not fall or damage trees marked for retention, or marked as boundary trees.

4. Special Conditions

Critical boundaries

The harvest area is bounded by fences on the east, south and western sides, while an internal forest road demarcates the northern boundary. Refer to the Operational map for more detail. Marking of the harvest area boundary is not proposed.

Private Property – adjoins part of southern boundary of compartment 107, and part of the western boundary of compartment 104.

Note: Mr R Caskey (Ph – 6896 2934), neighbour on the western boundary, requires access through the forest along the forest road that demarcates the northern end of the harvest area. When using this road for harvest or haul activity, care should be taken to allow his access.

No sooner than two weeks prior to harvesting operations commencing, Mr Caskey shall be instructed by FCNSW, via letter, of the need to notify the contractor on-site when he is using the access.

Further, it is the responsibility of the Contractor to ensure that arrangements for management of the access by the neighbour shall be included in the Contractor's Site Safety Plan.

National Park – adjoins the harvest area on the southern and part of the western boundaries of compartment 107.

Research / Inventory Plots

No current research plots or trials are known in this compartment.

There are a number of temporary inventory plots within the harvest area which, if found, should be treated under normal harvesting prescriptions.

Leases/OPs

The area is not covered by an Occupation Permit for beekeeping and/or grazing.

The area is or may be subject to grazing under Grazing Permit.

Infrastructure

- Fences. No fence may be damaged except at places approved by the Supervising Forest Officer. Any damage to a fence by the Contractor must be immediately reported to the Supervising Forest Officer and fixed immediately by the Contractor.
- Gates and roads. The Contractor must keep the gate(s) on the forest boundary, and any located within the harvest area, as found (open or closed). Existing roads must not be blocked or damaged. Any damage must be repaired immediately.
- Debris. Logging debris must be prevented from accumulating within 5 metres of any protected tree during a logging operation. If it does accumulate, then it must be flattened to a height less than one metre, minimising ground disturbance.
- Apiary Sites. A 20m buffer must be applied around each bee hive encountered.

Transmission Lines/Cables/Pipelines

There are no known electrical transmission lines present in the harvest area. However, contractors are reminded that if they encounter a transmission line then:

- *Harvesting machinery must not operate within 20m of this transmission line.*

Forest Management Zoning Conditions

FMZ 3B – an area exists in compartment 104 designated for maintaining large crowned trees and floristic diversity. This area shall be treated under normal 'Thinning silvicultural' prescriptions.

FMZ 4 'General Management' occurs within the compartment (shown on HPOM). Normal harvesting prescriptions apply in this area.

Cultural Heritage Conditions

There are no cultural heritage sites (Aboriginal or non-Aboriginal) known in this compartment. However, there are Aboriginal cultural heritage sites recorded outside the state forest. The SFO should watch out for any of these areas that may occur, and record them in their SFO notes and on their maps, and apply appropriate protection.

If a site that might be a cultural heritage site is found:

- Its location must be promptly reported to the Forestry Office via Supervising Forest Officer.
- A 20m no-harvest zone must be applied around this site until advised otherwise.

Flora and Fauna Conditions

No stick nests were recorded in the traverse. The SFO should watch out for these and any others and apply prescribed protection around them if found.

There are old species records of Fuzzy Box (*E. conica*) and Western Grey Box (*E. microcarpa*) within 5 km of the boundaries of the tract, although none were observed during the traverse. In addition, forest type mapping indicates the presence of Yellow Box (*E. melliodora*). Further, an individual of Grey Box was observed on the traverse. These species are potential indicators of EEC's and should be looked for during field work.

The SFO must search for threatened species and mark-up the block as per the Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3.

Mark-up Conditions

Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3 for prescriptions.

Tree retention Conditions

Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3 for prescriptions.

Site-Specific Conditions, Exclusion Zones & Modified Harvest Areas

There are no known areas of heath, rocky outcrops, cliffs and/or endangered ecological community (EEC) occurring within the net operational area that need additional harvest exclusions or modified harvesting zones implemented.

A single tree of a species indicative of EEC's (i.e. grey box) was found during the traverse survey. The SFO should watch out for any areas of these, and other EEC species, that may occur, and if required record them in their SFO notes and on their maps, and apply appropriate protection.

These areas are not shown on the Operational Map.

Large habitat trees (LHTs) recorded during traverse survey are shown on the operational map. Additional LHTs may be identified as mark-up progresses.

Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3 for prescriptions.

Species Known or Likely to Occur

There are no known records of Threatened fauna or flora present within the planning area that require prescriptions within this plan.

Contractors and supervisory staff must immediately report any sightings of TSC Act, Schedule 1 and 2 species to the Supervising Forester (record details on Page 13). Appropriate action must then be taken, which may include amending the Harvesting Plan to include additional prescriptions if necessary. Refer to Section 6 and/or Section 6.2 of the Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3.

Fisheries Licence Conditions

Applicable Fisheries Licence conditions are detailed in the South-Western Cypress – IFOA. Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3 for prescriptions.

Soil and Water Protection Conditions

Applicable Environmental Protection Licence conditions are detailed in the South-Western Cypress – IFOA. Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3 for prescriptions.

Site-specific EPL conditions – The following features occur within the planned area. Refer to operational map for more detail.

Elements	Conditions
Unmapped Drainage Lines	5m Drainage Feature Protection Zone
Dams	10m

It is the responsibility of the SFO to identify any exclusion areas which will need to be crossed during harvesting. The SFO should then contact the Planning Officer to obtain the necessary approval.

There are no Road, snig / extraction track drainage line crossings anticipated or approved for use on drainage features within this operation.

However, if any are required then sufficient notice (at least 1 week) is required to enable soil samples to be taken for sediment testing and to support Schedule 3 approvals. Additionally, details are to be recorded in the table below:

Drainage Feature	Road / Bush Track / Extraction Track	Soil Dispersibility Assessment Date (IFOA Clause 299)	Regional Manager / EPA Approval Date or N/A

Copies of the Schedule 3 Approvals must be attached and any site-specific prescriptions in those approvals must be applied as conditions of this plan

Road Works Conditions

Nil required – maintenance work on designated harvest-use roads was completed by FCNSW in November 2016.

(Note: The access points for vehicular traffic entry from the harvest area onto the highway was investigated (site distance including possible vegetation obstructions) and considered adequate. However, persons leaving the harvest area are reminded to check for highway traffic before entering the highway. This reminder should also be included in the SSP prepared by the Contractor.)

Legal Conditions

This operation may only proceed while this operational plan, the relevant site safety plan and the Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – South-Western Cypress v.3 are held on site.

This operation must comply with the following:

- ☐ Standard Harvest Plan Conditions for Native Forest Operations in Western Region – South-Western Cypress v.3
- ☐ Tree-marking Protocol for Native Forest Operations in Western Region – South-Western Cypress
- ☐ Licence conditions issued by Forests NSW under the Forestry Act (2012).
- ☐ Forest Practices Code, Part 2, Timber Harvesting In Native Forests (4th edition 1999).
- ☐ Forest Practices Code, Part 4, Forest Roads and Fire Trails (1999).
- ☐ Integrated Forestry Operations Approval issued under Part 4 of the Forestry and National Parks Estate Act 1998 (IFOA) as amended July 2013 including associated licences:
 - Threatened Species Conservation Licence (TSCL) issued under the Threatened Species Conservation Act 1995
 - Fisheries Management Licence issued under Part 7 (Div 3) Fisheries Management Act 1994
 - Environmental Protection Licence (EPL) issued under the Protection of the Environment Operations Act 1997.

Supervising Forest Officer's Notes

[illegible]

Certificate Of Clearance To Move From Current Compartment(s)

To: _____, Supervising Forest Officer.

I **request** approval to move my logging crew and all associated machinery from Compartment(s) _____ in _____ State Forest to the next area in accordance with Section 5.5 of the Forest Practices Code Part 2 Timber Harvesting In Native Forests.

I **certify** that:

- ☐ all permanent roads, trails and mitre drains have been cleared of harvesting debris;
- ☐ butt damage to retained trees has been kept to acceptable limits;
- ☐ all trees marked for removal have been felled;
- ☐ utilisation limits have been satisfactorily met;
- ☐ stump heights conform to requirements;
- ☐ all hanging trees have been brought down;
- ☐ all log dump sites have been satisfactorily restored as required;
- ☐ harvesting debris is not accumulated around retained trees;
- ☐ all accumulated litter has been disposed of properly;
- ☐ all modified harvesting conditions have been complied with;
- ☐ all snig track and road drainage has been installed satisfactorily and other required rehabilitation work has been completed;
- ☐ all necessary repairs to damaged roads, signs, fences and other structures have been carried out.

I **believe** that I have met all my obligations under the conditions of the Timber Licence that applies to the area just completed and any N&PW Act Licence that applies to the area just completed, as stated in this Harvest Plan.

Signature: _____
Licensee/Contractor

Licence No: _____

Date: _____

As a result of inspections of the logging operations carried out in accordance with this Harvest Plan, I am satisfied that, to the best of my knowledge, the harvesting licensee/contractor responsible for this harvesting operation has satisfactorily completed all work. Approval is given for her/him to remove her/his machinery and equipment and leave the area/commence operations in another harvesting plan area, being:

Compartment(s): _____, in _____ State Forest.

This clearance does not release the licensee/contractor from any obligation to undertake any remedial work if deficiencies, found during any inspections of the area made within 12 months of the date of this post-harvesting inspection, are shown to have resulted from inadequate practices during the harvesting operation.

Date of last inspection of the area by the Supervising Forest Officer: _____

Supervising Forest Officer _____
