FORESTRY CORPORATION OF NEW SOUTH WALES- WESTERN REGION

NATIVE FOREST HARVESTING PLAN WBcfi 1608

Refer: FPC 2010/01

Pilliga West State Forest – Compartment 86

Certification

This plan has been prepared in accordance with the Integrated Forestry Operations Approval issued under the Forestry and National Park Estate Act 1998. The Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2 apply to this operation.

Prepared By: Conan Rossler District Manager	Endorsed By: Ross Irvine Environment & Resource Manager	Approved By: Andrew O'Brien Senior Manager
Signature 	Signature 	Signature 
Date 12/9/2016	Date 18/9/2016	Date 21/9/2016

Note: Approval includes the Harvest Plan Operational Map (HPOM) with the corresponding approval date displayed on the map, verifying final approved version. Locality and forest type maps are included for information only and do not form a part of this approval.

PRE-OPERATIONAL BRIEFING (SUPERVISING FOREST OFFICER ACKNOWLEDGMENT)

I confirm that I have received a copy of the Harvest Plan for the above Compartment. I have been briefed on the conditions of the Plan. I understand the requirements for supervision and operational control as explained to me by the Forest Manager or his/her delegate.

SUPERVISING FOREST OFFICER: _____

Signature: _____ Date: _____

PRE-OPERATIONAL BRIEFING (LICENSEE/CONTRACTOR ACKNOWLEDGMENT)

No operations may commence under this Harvest Plan before the Licensee/contractor have received a formal pre-operational induction by FCNSW and written approval provided to commence operations.

I confirm that I have received a copy of this Harvest Plan and that:

- ☐ I understand the conditions of the Plan,
- ☐ I will inform all relevant people not present at this briefing, prior to them starting operations, of these aspects of the Plan, as explained to me by a FCNSW officer.

Signature: _____ Name: _____ Date: _____

Position: _____ Licence No: _____

Principal licensee/contractor/other (explain)

Signature: _____ Name: _____ Date: _____

Position: _____ Licence No: _____

Principal licensee/contractor/other (explain)

Description of Proposal

White cypress sawlogs, ironbark sawlogs and green residue will be harvested under regulation of the Integrated Forest Operations Approval for Brigalow-Nandewar Region (B-N IFOA).

The operation will use mainly mechanical harvesting and processing to produce logs and forward them to dumps. The logs will be removed from the forest by truck.

Natural regeneration is planned. No after-harvest burning or planting is proposed.

Attachment 1: Site Safety Plan prescribes the safety requirements and Medical Emergency Evacuation Plan for this harvesting operation.

No construction or upgrading of roads or bush tracks are proposed. Some bush tracks may be reopened. Existing roads and tracks will be maintained in accordance with the Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2.

Area Identification and Yield Estimates

State Forest	Compartment/s	Region	Management Area	Harvest Plan ID
Pilliga West	86	Western	Pilliga	44793

COMPARTMENT	86
Plan Cpt Event ID	56211
Gross Area (ha)	435
Net Harvest Area (ha)	428
Estimated Yield Cypress Sawlog (m ³)	4500
Estimated Yield Ironbark / Hardwood Sawlog (m ³)	250
Estimated Yield Residue (t)	100

Silviculture and Harvesting Prescriptions

The planning area has a history of white cypress harvesting. The dominant/co-dominant forest types throughout the planning area are combinations of white cypress, narrow-leaved ironbark, bull oak, Blakely's red gum and rough-barked apple, with smaller areas of Fuzzy Box, as shown on the forest type map. Mature white cypress stands within these compartments were established during regeneration events in the 1890's and 1950's. These stands have been thinned on several occasions, with the last commercial harvesting event occurring in 2000, that being a commercial thinning of most of the eastern side of the compartment.

Regeneration establishment and stand improvement have resulted from previous harvesting and non-commercial thinning, creating conditions suitable for a combination of commercial thinning (vertical cut silviculture) and release harvest. The area of each silvicultural treatment must be mapped and recorded in the Post-logging information section of this plan.

This compartment has significant areas that will be suitable for wet weather harvesting. These areas will be identified ahead of any harvesting operations commencing and GPS mapped. These areas will be quarantined for wet weather operations only. Areas identified as dry weather only will be harvested accordingly.

The table below depicts the history of the operational area

Year	1986/7	1992	1996/7	2000
TSI	X	X	X	X
NCT	X	X	X	X
HR Burning	X	X	X	X
Wildfires	X	X	X	X
Logging Cypress Sawlog	√	X	√	√
Logging Hardwood Sawlog	X	√	X	X

√ - applies, X – not applicable

Silvicultural Planning

According to stand variability, a combination of cypress release and thinning, and the harvesting of ironbark and bull oak, will be undertaken in this operation as per the Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2.

The cypress 'release' operation is aimed at releasing established regeneration from competition with the mature overstorey. Once released, the stand will require thinning in the next 10-20 years.

The cypress thinning operation is aimed at reducing competing stems whilst concentrating growth on the retained, higher quality, future sawlogs. This stand will require further thinning in around 10-20 years.

The Ironbark log harvesting is aimed at removing commercially mature trees, trees lacking potential for future growth and trees competing with more dominant trees within the stand. Where regeneration is not present or unlikely to occur, trees should be selected to build upon canopy openings so as to encourage establishment and development of regeneration.

Bull oak will be harvested as per Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2. **Dry firewood (on ground and standing) must not be harvested.**

The SFO will ensure that all relevant tree retention and silvicultural prescriptions are met during harvesting operations.

The operation must, as far as practicable, not damage individual plants of good form regeneration or sapling size of white cypress or ironbark, especially where there are few others nearby.

Tree Marking

Cypress

The area will be **primarily** tree marked for **retention**. In any such area, the operation must, as far as practicable:

- For the allowed species, fall each tree not marked for retention, unless it clearly does not meet the Specifications for White Cypress Sawlogs (Appendix 1 of the Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2), AND
- Not fall or damage trees marked for retention, or marked as boundary trees.

At the discretion of the SFO, areas of merchantable Cypress may be tree marked for **removal** if stand conditions dictate. Any change in marking technique must be noted in the SFO's Notes, and these areas annotated on the Operational Map. Boundaries between the different marking strategies must be clearly defined in the field, with harvest contractors advised of the change in marking strategy.

In any such areas the operation must, as far as practicable:

- For the allowed species, fall each tree marked for removal, unless it clearly does not meet the Specifications for White Cypress Sawlogs (Appendix 1 of the Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2), AND
- Not fall or damage trees not marked for removal, particularly those marked for retention or marked as boundary trees.

Ironbark

The area will be tree marked for **removal**. The operation must, as far as practicable:

- For the allowed species, fall each tree marked for removal, unless it clearly does not meet the Specifications for Western Ironbark Sawlogs (Appendix 2 of the Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2), AND
- Not fall or damage trees not marked for removal, particularly those marked for retention or marked as boundary trees.

Bull oak

No additional marking for this species is proposed. Harvesting will be as per Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2.

4. Special Conditions

Critical boundaries

The Compartment is bounded by a combination of roads to the north, east and south, and a drainage feature on the eastern flank.

Refer to the HPOM for more detail. Apart from drainage feature protection zones, marking of the compartment boundaries is not proposed.

Private Property

Merriwee Creek separates the operational area from private property to the east.

National Park

There are no national parks or formal reserves adjoining the planning area.

Research / Inventory Plots

As shown on the HPOM, a CFI plots are located at 686963E 6603800N and 687047E 6603783N. These plots will be measured before harvesting commences and treated silviculturally exactly the same as the adjacent forest.

Leases/OPs

The area is covered by an Occupation Permit for beekeeping. In particular:

- Apiary Sites. A 20m buffer must be applied around each bee hive encountered.

- Fences. No fence may be damaged except at places approved by the Supervising Forest Officer. Any damage to a fence by the Contractor must be immediately reported to the lessee via the Supervising Forest Officer and fixed immediately by the Contractor.

Transmission Lines/Cables/Pipelines

There are no known transmission lines/cables/pipelines in the planned area.

Forest Management Zoning Conditions

FMZ 4 'General Management' occurs within the compartment (shown on HPOM). Normal harvesting prescriptions apply in this area. As also shown on the HPOM, an area of Modified Harvest Area (FMZ 3B) occurs within the operational area. The purpose of this Modified Harvest Area is to maintain the persistence of large crowned eucalypts as fauna habitat. Accordingly, normal cypress silviculture will be applied in this area.

Cultural Heritage Conditions

There are no cultural heritage sites (Aboriginal or non-Aboriginal) known in this compartment. If a site that might be a cultural heritage site is found:

- Its location must be promptly reported to the Forestry Office via Supervising Forest Officer.
- A 20m no-harvest zone must be applied around this site until advised otherwise

Flora and Fauna Conditions

The SFO must search for threatened species and mark-up the block as per the Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2.

As shown on the HPOM a significant ironbark tree is located at 686925E 6603817N. This tree will be identified infield and harvest operators advised to take special care to not damage this tree if adjacent trees are harvested.

Mark-up Conditions

Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2 for prescriptions.

Tree Retention Conditions

Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2 for prescriptions.

Site-Specific Conditions, Exclusion Zones & Modified Harvest Areas

Blakely's red gum and White Box occurs throughout the operational area, with some areas potentially qualifying as Box Gum Woodland EEC. Where such areas are encountered when marking up, field staff must refer to Schedule 8 Parts 1 and 2 of the Brigalow-Nandewar IFOA (as per Attachment 1 of the Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2) to determine the appropriate marking and operational strategies. Where the area is determined **not** to

be Box Gum Woodland EEC, it should be treated as per the rest of the operation. Where the area **is** determined to be Box Gum Woodland EEC, the harvest planning forester must be consulted regarding Clauses 270-273 of the Brigalow-Nandewar IFOA. The extent and location of such EECs must also be GPS mapped so that a written record of such may be recorded as per IFOA Clause 260.

There are no known areas of heath, cliffs and/or other endangered ecological communities (EECs) occurring within the net operational area that need additional harvest exclusions or modified harvesting zones implemented.

The SFO should watch out for any of these areas that may occur.

Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2 for prescriptions.

Species Known or Likely to Occur

A data search of threatened species records has indicated that there are current records of Barking Owls within the compartment. SFO's need to keep an eye out for roost habitat (wilga trees) and or nests.

Records of Koalas have been recorded in adjacent compartments. SFO's will need to look out for scats.

There are no other known records of threatened fauna, flora or habitat features present within the planning area that require prescriptions within this plan.

Contractors and supervisory staff must immediately report any sightings of Schedule 1 and 2 species to the Supervising Forester. The Harvesting Plan must then be amended to include additional prescriptions if necessary.

Fisheries Licence Conditions

Applicable Fisheries Licence conditions are detailed in the Brigalow – Nandewar IFOA. Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2 for prescriptions.

Soil and Water Protection Conditions

Applicable Environmental Protection Licence conditions are detailed in the Brigalow – Nandewar IFOA. Refer to Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2 for prescriptions.

Site-specific EPL conditions – The following features may occur within the planned area. Refer to operational map for more detail.

Elements	Conditions
Unmapped Drainage Lines	5m Drainage Feature Protection Zone
1 st order mapped drainage line or mapped drainage depression	10m Drainage Feature Protection Zone
2 nd order mapped drainage line or mapped drainage depression	20m Drainage Feature Protection Zone

3 rd order mapped drainage line or mapped drainage depression	30m Drainage Feature Protection Zone
4 th order mapped drainage line or mapped drainage depression	40m Drainage Feature Protection Zone
5 th order mapped drainage line or mapped drainage depression	50m Drainage Feature Protection Zone
Dam	10m Drainage Feature Protection Zone

It is the responsibility of the SFO to identify any exclusion areas which will need to be crossed during harvesting. The SFO should then contact the Planning Forester to obtain the necessary approval.

A dam is located at 687060E 6604369N – a 10m protection zone should be applied.

No drainage feature crossings are proposed to be used during this operation.

Road Works Conditions

Approximately 11km of existing roads, tracks and crossings will be maintained in accordance with the Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar v3.2.

Legal Conditions

This operation may only proceed while this operational plan, the relevant site safety plan and the Standard Harvest Plan Conditions for Native Forest Operations in Western Region – Brigalow Nandewar v3.2 are held on site.

This operation must comply with the following:

- ☐ Standard Harvest Plan Conditions for Native Forest Operations in Western Region. – Brigalow Nandewar
- ☐ Licence conditions issued by Forests NSW under the Forestry Act (1916).
- ☐ Forest Practices Code, Part 2, Timber Harvesting In Native Forests (4th edition 1999).
- ☐ Forest Practices Code, Part 4, Forest Roads and Fire Trails (1999).
- ☐ Integrated Forestry Operations Approval issued under Part 4 of the Forestry and National Parks Estate Act 1998 (IFOA) as amended May 2003 including associated licences:
 - Threatened Species Conservation Licence (TSCL) issued under the Threatened Species Conservation Act 1995
 - Fisheries Management Licence issued under Part 7 (Div 3) Fisheries Management Act 1994
 - Environmental Protection Licence (EPL) issued under the Protection of the Environment Operations Act 1997.

Date of cessation of logging: _____

Supervising Forest Officer's Notes

[illegible]

Certificate Of Clearance To Move From Current Compartment(s)

To: _____, Supervising Forest Officer.

I **request** approval to move my logging crew and all associated machinery from Compartment(s) _____ in _____ State Forest to the next area in accordance with Section 5.5 of the Forest Practices Code Part 2 Timber Harvesting In Native Forests.

I **certify** that:

- ☐ all permanent roads, trails and mitre drains have been cleared of harvesting debris;
- ☐ butt damage to retained trees has been kept to acceptable limits;
- ☐ all trees marked for removal have been felled;
- ☐ utilisation limits have been satisfactorily met;
- ☐ stump heights conform to requirements;
- ☐ all hanging trees have been brought down;
- ☐ all log dump sites have been satisfactorily restored as required;
- ☐ harvesting debris is not accumulated around retained trees;
- ☐ all accumulated litter has been disposed of properly;
- ☐ all modified harvesting conditions have been complied with;
- ☐ all snig track and road drainage has been installed satisfactorily and other required rehabilitation work has been completed;
- ☐ all necessary repairs to damaged roads, signs, fences and other structures have been carried out.

I **believe** that I have met all my obligations under the conditions of the Timber Licence that applies to the area just completed and any N&PW Act Licence that applies to the area just completed, as stated in this Harvest Plan.

Signature: _____

Licence No: _____

Date: _____

Licensee/Contractor

As a result of inspections of the logging operations carried out in accordance with this Harvest Plan, I am satisfied that, to the best of my knowledge, the harvesting licensee/contractor responsible for this harvesting operation has satisfactorily completed all work. Approval is given for her/him to remove her/his machinery and equipment and leave the area/commence operations in another harvesting plan area, being:

Compartment(s): _____, in _____ State Forest.

This clearance does not release the licensee/contractor from any obligation to undertake any remedial work if deficiencies, found during any inspections of the area made within 12 months of the date of this post-harvesting inspection, are shown to have resulted from inadequate practices during the harvesting operation.

Date of last inspection of the area by the Supervising Forest Officer: _____

Supervising Forest Officer _____

Note: The purpose of this log is to track amendments to the Harvest Plan from time of first approval. All maps, Harvest Plans etc. are to be clearly identified with a version # and date so that changes to the Plan may be clearly identifiable. The Harvest Planner is responsible for ensuring all amendments are implemented, recorded and filed

Supervising Forest Officer's Hand-Over Acknowledgment

I confirm that I have received a copy of the Harvest Plan for the above Compartment. I have been briefed on the conditions of the Plan and the progress of the operation. I understand the requirements for supervision and operational control, as explained to me by the current SUPERVISING FOREST OFFICER.
